Only 7 in 100 small-business leads go live, after 17.6 days

7.4%
of leads go live

17.6 days
lead to live

3 calls
status chases per customer

₹15,053
cost per activation

2.0% vs 9.6%
activation without vs with GSTIN

Target customers: who we serve first, with the bundle and price each one gets

Micro retail & services

Wave 1 · digital only

55% of base · 4.1% activate

Dukaan Starter

5G AirFiber + 1 business line

₹1,198 /month

Professional offices

Wave 1 · digital

25% of base · 11.1% activate

Pro Office

Fibre 300, 3 lines, email + security

₹4,015 /month

Small multi-site

Wave 2 · with sales

15% of base · 11.0% activate

Chain Connect

Fibre, failover, CCTV, SD-WAN (5 sites)

₹25,975 /month

Small manufacturers

Wave 2 · with sales

5% of base · 12.8% activate

Factory Link

Leased line, failover, firewall, sensors

₹13,689 /month

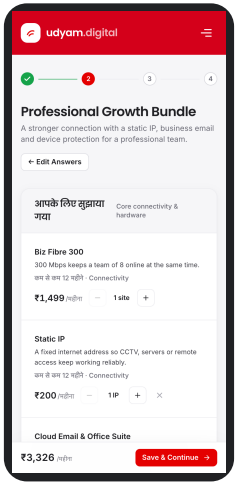

Working prototype: one sitting, every role covered

Advisor → Quote → Sign-in → **KYC** → e-Sign → UPI → Install → Live

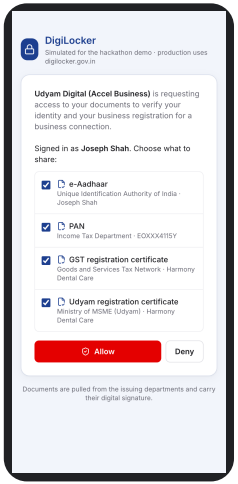

KYC: DigiLocker in about a minute, or business PAN + ₹1 bank check + documents read on our server

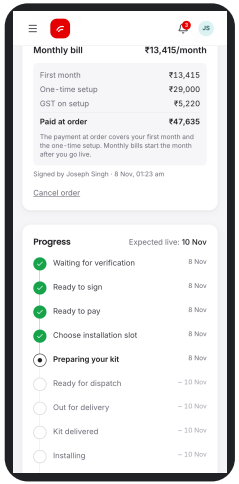

Mitu, in Hindi

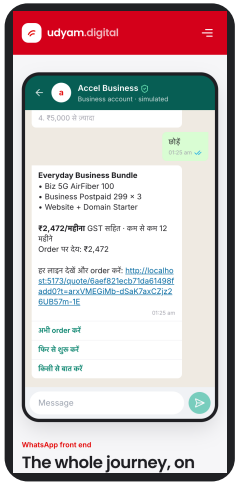

One monthly price

DigiLocker

Live tracker

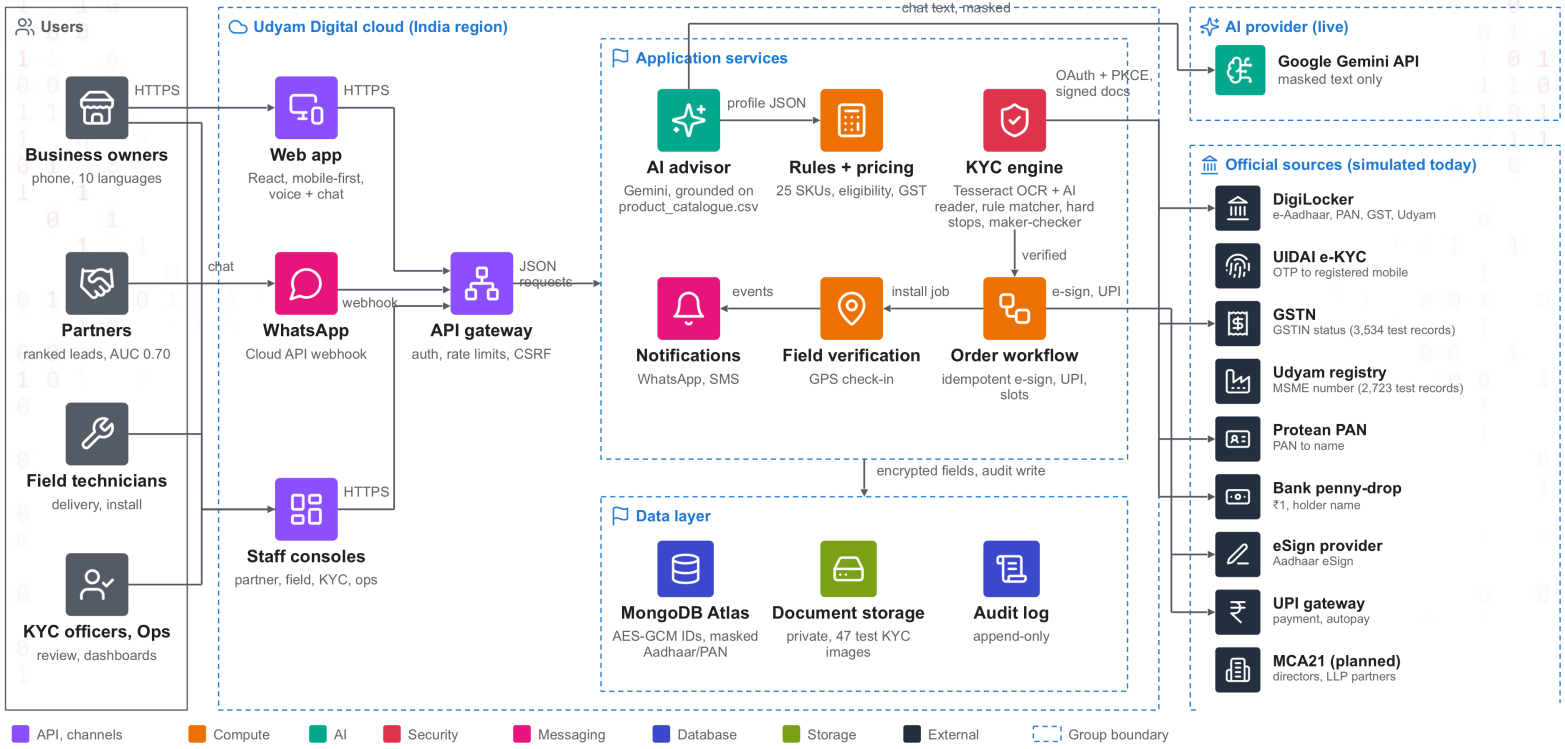

WhatsApp

Seven roles, one system

- Business owner
- Owner on WhatsApp
- Channel partner
- KYC officer (maker)
- Second officer (checker)
- Technician
- Operations

Gemini grounded on catalogue · **Rules set every product and price** · **10 languages, type or speak** · **Same journey on WhatsApp**

Solution architecture: components and data flows

Platform Partner unstop

Trust: verified at source, read twice, approved by two people

Two ways to verify

- Fast path: DigiLocker returns e-Aadhaar, PAN, GST and Udyam, signed by the issuers; signatures checked
- No DigiLocker: business PAN + ₹1 deposit returns the account holder's name
- Uploads read on our server by Tesseract OCR and an AI reader, matched to the registry by rules

Hard stops: no override

- Cancelled or suspended GSTIN
- GSTIN, Udyam, Aadhaar or bank already used by another owner
- Tampered certificate (GSTIN checksum fails)
- Overrides need a reason and a second officer
- Line goes live only after GPS check-in and the owner's code

AI reliability

- AI only understands the owner; rules set product and price
- Every order line re-validated on the server
- GSTIN, PAN, Aadhaar, phone masked before any AI call
- AI never decides KYC
- Fallback: Gemini 3.5 Flash → Flash Lite → local rules

Business case: faster to live, fewer calls, lower cost

3 min
to a clear quote, instead of 3–5 days

~1 min
KYC with DigiLocker, 17 automatic checks

Tracker
replaces 3 status calls; WhatsApp updates

Pricing and savings

One monthly price incl. GST, from the catalogue: **₹1,198** (micro) to **₹25,975** (5-site chain). Digital channels cost **₹4,026–6,352** per activation vs **₹24,335** for field sales.

Rollout in three gated phases

1. Pilot
2 tier-1 cities · professionals and micro · English, Hindi

2. Scale
Tier 2 · multi-site and factories with sales help · WhatsApp

3. National
All circles · telco order and billing integration

Five numbers decide the pilot

	Case baseline → Pilot target
Lead to activation	7.4% → 12%
Days to activate	17.6 → ≤ 7
Status calls per customer	3 → < 0.5
Cost per activation	₹15,053 → < ₹9,000
6-month churn	15.2% → 11%

Baselines from the case data; targets are our proposal for the pilot. Lead ranking model: AUC 0.70 on held-out leads.

Risks, data privacy and security

Top risks and how we handle them

Risk	Mitigation
Fake or borrowed business identity	Proof of control, hard stops, maker-checker
AI misreads a document	Two readers + registry match; officer reviews
Customer data sent to an outside AI	Identifiers masked; enterprise AI tier; named in notice
AI slow or down	Flash Lite, then local rules; journey never stops
Micro shops are price-sensitive	₹1,198 starter; price test in the pilot
Sales see digital as a threat	Hot leads routed to them; commission on activation

Privacy and security by design (DPDP Act 2023)

Consent
one stated purpose; expires in 30 min; can be withdrawn

Minimisation
only needed fields; Aadhaar last 4 digits only

Encryption
GSTIN, Udyam, Aadhaar ref AES-256-GCM; HMAC lookups

Masking
IDs masked on screens and before any AI call

Access
owner and KYC/ops only; every view audited

Owner rights
access and erasure in the app, 30-day due date

Security
httpOnly cookies, CSRF check, rate limits, hashed OTPs

Retention
erasure on request; scheduled purge planned

Full 1-page privacy and security note → All data is synthetic.
